

Yes No Questions

What are you trying to do?

- Think of and discuss questions that have yes no answers
- Collect answers to yes no questions

What do you need?

- Up to the whole class for a mental warmup
- Yes No cards
- Yes No questions cards

What do you do?

- What are some things you would like to know more about?
What are some questions you can ask each other?
- One simple question is one that we answer "yes" or "no" to.
e.g. Do you like tomatoes? Is your name Jack? Are you 10 years old?
- How can you collect these answers together? e.g. If you answer "no" put a red counter in a bag. If you answer "yes" put a yellow counter in a bag. You then count up how many counters in each colour when you have finished asking people to answer your question. What will this tell you?
e.g. Most people like tomatoes.
- You can also use the Yes No cards. Select someone to ask everyone a question. You then hold up a Yes or a No card. Select another student to count all the Yes cards. Select another student to count all the No cards. What did you discover?
- You can also keep a tally of how many people answer Yes or No. Remember that tally marks collect groups of 5.

Variation?

- Make a list of your own Yes No questions
